

CAPABILITY OVERVIEW

BosTECK provides consultancy services for micro and SME's looking to build a future within the Australian Defence Industry. We combine our experiences, knowledge, partners and networks to offer a range of services covering:

- Bid writing and strategy;
- Feasibility analysis for Defence projects;
- Market Entry planning, strategic planning, captures and pursuits;
- Technical writing in ASDEFCON and S1000D (through our partners AusSTE);
- Legal support and advisory (through our partners at LawForce Alpha);
- Commercial, financial and accounting support and advisory;
- Advice on grant applications;
- Advice on DISP;
- Training services;
- Project management support services; and
- General advice on Defence related topics.

BosTECK offers bespoke services in supporting Defence in exercise support, design, operations analysis, training development and strategy in the Live, Virtual and Constructive (LVC) domains. We also provide support in Combat System testing and integration, Test and Evaluation services (including trials, test planning and conduct), strategy and tactical concept development. BosTECK supports new technology development in areas of data analytics, AI and VR integration in applications for Defence.

We are ready to support SME's and Prime's seeking to partner on Defence projects and our consultants are able to offer a wide range of services to support these aims.

CAPABILITIES

Consulting Services; Professional Advisory; Project Management; C4ISR; Tactical Data Links; Test and Evaluation Practitioner/Manager/Director levels; Training development services; Systems Integration; Combat Systems; strategy and captures; Data analytics; AI and VR applications.
