Space Launch Risk Assessment

Praxis Aerospace provides engineering and project management services in support of Australian Aerospace and Space programs. Experienced and trusted staff support a range of aerospace engineering and project management disciplines for both new aircraft acquisitions aircraft in-service support programs, and space launch licence applications.

THE SKY'S THE BASELINE.

DISCRIMINATORS & VISION

'Praxis' encompasses theory, action and reflection and defines our approach as an organisation. We are innovative, committed to our customers, always acting with humility, integrity and boldness.

"To be Australia's premier aerospace engineering company. Providing cost effective, experienced and trusted staff to support the development of Australia's air and space capabilities."
