

SERVICES

EXPERIENCE – PRECISION – DEDICATION – QUALITY

Rockpress -Rocklea Pressed Metal -has been in business since 1972 and has grown to become one of Brisbane’s most highly regarded steel fabrication suppliers. Our in-house services provide accurate, on-time, high-quality, 3D Drafting, Laser Cutting, CNC Punching, CNC Bending, Welding & Fabrication, Powder Coating, and metal processing services using state of the art equipment. Rockpress services clients in Australia and overseas.

LASER CUTTING

4 state of the art Trumpf Fibre and CO2 Laser cutting machines with tube laser cutting capabilities and capable of cutting up to 6000mm x 2500mm sheets up to 32mm thick materials.

CNC BENDING

Our 9 State of the art Trumpf Press Brakes with pressing capability up to 320 tonnes and 4.4m in length, allows us to offer a cost effective, highly accurate bending solution.

WELDING & FABRICATION

Simple to complex welding tasks can easily be handled in our Heavy and light welding fabrication shops. We provide in-house MIG, TIG, Robotic, Beam and Spot-Welding services.

EXTRA PROCESSES

Rockpress offers a range of extras such as drilling, tapping, countersinking, clinch nuts, standoffs, nutserts & fasteners, coordinate- measuring machine (CMM).

FINISHES

We offer quality metal finishes such as power-coating, painting, hot dip galvanising, thermal spraying, electroplating, bead blasting and polishing.

3D DRAFTING

The Rockpress in-house drafting team uses the latest 2D and 3D modelling software and will turn your ideas into reality for you to view on a PC before manufacturing.

CNC Milling & Machining

The Rockpress Metal Punching area uses state-of-the-art TRUMPF TruPunch 5000 Punch press machines, with 20 stations in total. Each station indexes to 360 degrees.

CNC Milling & Machining

At Rockpress, our philosophy has always been to provide you with more service, support and expertise – to deliver you less in production times and manufacture costs. That’s why we’re excited to announce the launch of our latest **Makino PS95 Metal Milling Centre** as part of our expanded metal fabrication solution. Using the latest in Vertical milling technology, we can achieve absolute precision and accuracy with any machined components-in a fraction of the time. Rockpress has just added a state-of-the-art **Nakamura-Tome automatic Bar Feed Lathe** to our milling and turning operations.

KEY CUSTOMERS & PARTNERS

Our capabilities and advanced leading services are recognised by:

CAPABILITY

Our factory operates 16 hours a day, minimising delivery lead times

Our industry-leading innovation and approach to projects means that when you engage with Rockpress, you are taking advantage of cutting-edge technology to have your project completed faster, smarter, and more efficiently.

Results – We are focused and committed to meeting customer expectations.

Efficiency – using Lean principles and our inhouse develop JOTI procedure, attention to detail and industry experience, enables us to deliver projects within budget and on time.

Equipped – Using only the best Trumpf machinery and the latest technology to deliver quality and precision on all projects.

QUALITY STANDARDS

Quality and Safety Standards

At Rockpress, safety and consistent quality delivery are our two primary areas of focus. Rockpress conducts ongoing product development, continued professional development and internal quality control.
