

PARTNERS/INTEGRATIONS

Smartabase is the premier human performance optimisation software platform for elite sports teams and military organizations. We combine flexible technology and deep expertise to collect, analyse and provide comprehensive, real-time knowledge and insights, enabling better decision making to drive performance. Smartabase brings customers into a global human performance community that is powering the industry forward. For military organizations, Smartabase provides a secure, comprehensive picture of a service member's health and well-being, so they are combat-ready as an individual, a unit and a force.

CAPABILITIES

- Manage the physical and mental health and readiness of the force:
- Aggregate objective and subjective data in a single environment
- Create custom data collection forms
- Speed analysis with custom workflows and automations
- Create unique dashboards for roles and functions
- Automate notifications and communications
- Collect data on- or off-line with iOS and Android apps
- Secure your data with role-based access and security up to IL-5
- Data Visualization & Reporting: unlimited data combinations & intuitive configuration tools
- Consultants: Our Human Performance Consulting Team has delivered over 90,000 hours of implementation support and training across the globe.

DISCRIMINATORS

- 24x7 threat monitoring and alerting
- Data backups are compressed then encrypted to ensure they cannot be compromised
- Robust backup systems with full backup encryption
- Full encryption on all data in transit and at rest
- Infrastructure controls to meet Impact Level 5 (IL5) requirements
