

SDI Plastics is a high performing, customer driven, plastics manufacturer. Our core services include product design and innovation, prototyping, toolmaking and plastics manufacturing. SDI Plastics has the equipment and industry knowledge to provide long term sovereign capability products for the defence industry.

Established in Brisbane in 1993, our company has expanded internationally. As leaders in the sector, our culture is based on entrepreneurial spirit, with over 150 years of combined industry knowledge.

Our service and delivery has been the pinnacle of our success. Our exceptional workforce produce, package and distribute world class products with a proven track record to deliver quality products on time. This has all been streamlined to deliver commercial value and success for our customers.

Our Clients

Core Capabilities

Product Design & Innovation With innovation at the core of our thinking, our team of industrial designers and engineers work closely with our clients to design a custom product solution.

Prototyping Our team specialise in providing a large variety of 3D prototyping materials as well as metal prototyping for more complex projects.

Tooling SDI Plastics has the equipment, knowledge, skills and experience with both onshore and offshore toolmaking, to help you create world class tools for plastic injection moulding.

Injection Moulding Our manufacturing sites are based onshore, in Brisbane, as well as offshore in Malaysia. A total of 50 machines across two facilities with a manufacturing weight of up to 3 kg and a range from 50 tons up to 650 tons.

R&D & Innovation SDI Plastics have established innovative partnerships with key research institutes. Heavily involved in the field of research, gives us the creativity and test facilities to develop plastic products of the future, enabling faster production cycles and sustainable plastics.
