

PRODUCT

Masters & Young Pty Ltd is a Brisbane based electronics engineering company who specialise in the development, design and manufacture of new products and innovative industrial solutions.

We'll take your ideas and turn them into reality with our Define, Design and Deliver methodology.

We turn your electronic engineering ideas into designs, build prototypes and manufacture them in Brisbane, Australia to the highest standards.

CAPABILITIES

Our Define, Design and Deliver methodology...

1. Define the Challenge – This gives you clarity about the problem you're solving
2. Design A Solution – We'll help you to design the most effective solution to your challenge
3. Deliver Great Results - Our manufacturing process will help you to deliver great results on time and on budget

DISCRIMINATORS

We are Brisbane based with international reach and actively promote Queensland's design and manufacturing capability.

We are a full service contract electronics manufacturer.

We design and manufacture to ISO standards on every item we create. This is our benchmark, it's what is expected of us.

We are expert at developing test apparatus to ensure the delivered product works as per its specification.

KEY CUSTOMERS

Whilst we support big international clients such as Boeing and Niagara, our key customers come to us if they have needs with:

- Industrial controls
- Medical and healthcare electronics
- Mining applications
- Defence Applications
- Communication products

...and research institutions such as Universities.

KEY PARTNERSHIPS

We promote Queensland's industry capability to national and International markets about product development, process control, data acquisition, industrial control and medical equipment.

- Australian Mining Industry
- ADF Prime contractors
- Global Aircraft OEMs
- Australian Healthcare Associations
- International Medical Organisations

QUALITY ACCREDITATIONS AND AWARDS

- Certified by Lloyd's Register to ISO 9001, 14001 & 45001 Quality Assurance Systems
- Staff are also qualified to IPC610, J-STD-001 and IPC-7711/IPC-7721
- Member of the Surface Mount and Circuit Board Association
