

## PRODUCT

We will promote Queensland's industry capability to national and international defence markets by showcasing

- Guided Weapon and Explosive Ordnance energetics.
- Propulsion systems for long range fires.
- Hypersonic boosters.
- Next generation components (utilising carbon phenolic and other exotic materials).
- Solid rocket propellant.
- Precursor chemicals.
- Solid rocket motors.
- Rocket motor hardware.

## CAPABILITIES

- Solid Fuel Propulsion Systems
- Guided Weapons and Explosive Ordnance Energetics Manufacturing
- Hypersonic Boosters and next generation materials
- Chemical Manufacturing

## DISCRIMINATORS

The Black Sky Aerospace team has decades of experience that is ideally suited to defence programs. It has:

- Exclusive access to the world's largest private launch range (3 million acres)
- Extensive knowledge and expertise in local and international regulatory requirements and logistics
- An active launch program with proven technology.
- The only licensed facility manufacturing solid rocket propellant in the Southern Hemisphere

## KEY CUSTOMERS

We will promote Queensland's industry capability to national and International defence markets

- Australian Defence Force
- ADF Prime contractors

## KEY PARTNERSHIPS

We will promote Queensland's industry capability to national and International defence markets

- Australian Defence Force
- ADF Prime contractors
- Australian Space Agency
- Equatorial Launch Australia

## QUALITY ACCREDITATIONS AND AWARDS

- Certified to ISO 9001:2015 and AS9100D
- Risk Management Certification
- Explosives Manufacture/Import/Export/Test/Sell/Use Licenses
- Range Safety and Launch Control Certification
