

**VOLVO PENTA COMPANY**

Volvo Penta is a global manufacturer of engines with power outputs up to 1,050 hp for a wide range of vessels. In addition to diesel propulsion systems and generators, the company is pioneering the development and deployment of advanced hybrid electric power with technology partners.

With approximately 3,500 dealers in over 130 countries, Volvo Penta is part of the Volvo Group, one of the world’s leading manufacturers of heavy trucks, buses and construction equipment.

With our broad range of drive systems and engines for propulsion, auxiliary equipment and complete marine generator sets, we can provide a competitive advantage with low total cost of ownership backed up by global service and support. You and your customers will be able to maximize the value of your machine investment and ensure maximum uptime and productivity.
