

## PRODUCT

The Next Level Racing® range of products are sold in more than 53 countries and stocked by major retailers around the world. Next Level Racing® are also proud to have supplied some of the world's leading institutions for its products for training and research purposes.

- Flight – Next Level Racing® have formally partnered with the Boeing Company to provide three styles of flight cockpit. These styles include a Commercial edition, Military edition and a Next Level Racing edition cockpit to suit different class levels of flight, including, combat, space, commercial and general aviation.
- Racing – Providing a competitive edge to virtual racers, the Elite series is used by racing professionals globally.
- Motion - The Next Level Racing® Traction Plus motion platform is a truly world class simulation product designed to finally close the gap between the track/tarmac and simulation, with a product and experience no other simulator before it.
- Haptic - Go beyond the sounds in gaming, music, and movies, The HF8 is an immersive haptic experience with the eight strategically placed vibration zones that are powerful and localized for precision. Suits all flight seat styles.

## CAPABILITIES

Founded in 2009, Next Level Racing® is the world's leading simulation brand revolutionising simulation with its industry leading product range, the clear focus of the award-winning brand lies in innovation and quality, to meet the demanding needs of sim racers and pilots.
