

PRODUCT

The Qantas Group operates one of the largest MRO Organisations in the Asia-Pacific, with a long-established international reputation for operational excellence and safety.

With the experience gained in maintaining our own fleet of almost 300 Aircraft, we can respond to Customer Airline requirements with flexibility and an understanding of operator's concerns and constraints. Qantas is at the leading edge of technological development, constantly improving our products, processes and systems. Our focus on continuous improvement, world's best practice, and striving to become the most cost-efficient operation in the Airline industry, benefits operators utilising Qantas' engineering and maintenance services.
