

01 | Overview

TEi Services Pty Ltd; A family-owned North Queensland business since 1968. We are innovative problem solvers, specialising in design and manufacture of steel and speciality metals products, including armour grade materials.

Our diversity is our strength; we research and develop according to market needs; we build collaborative long lasting relationships and offer design through to commissioning under one roof.

03 | Competitive Discriminators

TEi services are paving the way in North Queensland as a leading-edge manufacturer. We are constantly adopting new technologies, materials and processes to add value to our client's business. We collaborate in research & development with academia, industry and clients to provide out of the box solutions. TEi consistently maintain practices to exceed world-class standards. We are proudly named in Rheinmetall Defence Australia's parliamentary submission as potential supply chain partner for Land 400 Ph2.
