

LEADERS IN ELECTRONIC DESIGN & MANUFACTURE

Masters & Young

ABOUT US

Design, manufacture, test and delivery of high-performance electronic assemblies for use in:

- Defence Communications Systems
- Power management and cooling systems
- Medical applications
- Simulations and training
- Industrial applications

CAPABILITIES

Dynamic Electronic design team with over 40 years of experience and in-house state-of-the-art CAD tools work with our customers to make their vision a reality.

Three Surface Mount Technology (SMT) lines and a highly skilled production team trained to IPC 610, J-STD-001 and IPC-7711/IPC-7721 enable us to manufacture anything we design to IPC Class 3.

Automated Optical Inspection, X-ray inspection, EMC testing and Full functional testing using custom built dedicated jigs.

QUALITY ACCREDITATIONS AND MEMBERSHIPS

- Certified by Lloyd's Register to ISO 9001 Quality Assurance Systems
- All Production Staff trained and qualified to IPC610, J-STD-001 and IPC-7711/IPC-7721
- Member of
 - Australian Industry Defence Network
 - Electrostatic Discharge Association
 - Surface Mount and Circuit Board Association
 - Industry Capability Network

DIFFERENTIATORS

We are Brisbane based with International reach. We actively promote Queensland's electronic design and manufacturing capability.

We are a full-service contract electronics manufacturer.

Design-Manufacture-Testing.

We design and manufacture all products to ISO standards. This is our benchmark, it's what is expected of us.

We are experts at developing test apparatus to ensure the delivered product works as per its specification.

KEY CUSTOMERS & PARTNERSHIPS
