BLACK6

MISSION

Black6 Lab's mission is to develop and support through partnerships, training and assessment solutions within virtual and mixed reality environments. Connecting the mind and body inside a training environment provides a level of immersion to capture the unconscious competency.

VISION

Black6 will drive educational outcomes for institutions and personal learning, innovating training solutions, assessment and human learning patterns via capturing data and analysis.

DISCRIMINATORS

- Black6 **Black Box** is a integrated learning environment *(ILE)* comprised of a virtual learning management system *(VLMS)*, content management system *(CMS)*, built to the total learning architecture *(TLA)* framework, with integrated xAPI profiling.
- VR/AR and Mixed reality learning and assessment tools. Data capture and distribution to student's learning management system.
- Partnership approach to develop and sustain your training, assessment and student management system solutions.
- Specialist solutions engineers providing value under a secure enterprise framework, agility and training focused outcomes.
- Inhouse design, modellers and engineers for custom solutions.
- Value for money proposition, saving customers significant costs in efficient processes through learning and assessment design and delivery.

PRODUCT

- Simulation hardware and
- **Virtual and mixed reality visual systems**
- xAPI interface with learning management system
- **Lesson syllabus design and delivery within an environment**
- Visual databases
- **Simulation modelling**
- Leaning support systems
- **Sustainability programs**
- AI assessment

CAPABILITIES

- Simulation design and manufacturing
- **Virtual and mixed reality systems**
- Training systems design and implementation
- **Aviation, marine, driver, construction, medical, defence**
- Black Box - Virtual Learning Management System
