

PRODUCT

We will promote Queensland's industry capability to national and international defence markets by showcasing:

- Radio communications, SATCOM terminals and battlefield management networks for ADF and Whole of Government customers;
- Secured mobile networked communication equipment and integration;
- Full suite of helmet and weapon-mounted integrated systems for ADF and Whole of Government customers;
- Space payloads, sensors and full-mission solutions for classified, civil and commercial customers;
- Advanced integrated communications intelligence (COMINT), electronic intelligence (ELINT) and targeting mission systems for strategic and tactical aircraft platforms; and
- Advanced Electro-Optic / Infrared (EO/IR), laser imaging and targeting sensor systems.

CAPABILITIES

Within Australia and New Zealand, L3H Communications Australia, L3H Integrated Mission Systems Australia and L3H Micro operate as an integral part of L3H Technologies Inc. This combined business:

- Employs over 550 in Australia and New Zealand: nearly half in QLD;
- Designs, Certifies and Manufactures bespoke RF technologies for export to world-class missile and radar primes;
- Support the Land 400.2 CRV capability with communications equipment and seek to support the successful Land 400.3 IFV winner out of QLD;
- Seeks to support Northrop Grumman Australia in the Joint Project 9102 Sovereign Satellite Communications System Bid;
- Conducts full OEM approved testing, maintenance, repair and logistics capabilities for Tactical Communications and select SATCOM terminals;
- Conducts a comprehensive sustainment capability negating the need to export equipment for repair and upgrade. This means rapid return-to-service of tactical Defence materiel measured in days rather than months; and
- Provides existing support throughout the APAC region via a comprehensive network of Field Service Representatives (FSR).

DISCRIMINATORS

- Queensland defence industry capability at its best! Conducting the full scope of design, certification, manufacturing, global trade compliance and sustainment in Defence Approved secure facilities in support of the Australian, New Zealand and seeking to maintain USMC equipment deployed to Australia out of the three Brisbane established and based facilities.
- Working with Team Defence Australia, the QLD Government, including Trade and Investment Queensland (TIQ) and their representatives in the APAC region to widen the scope of sustainment activities in QLD to include APAC Customers.

KEY CUSTOMERS

We will promote Queensland's industry capability to national and international defence markets including:

- Australian Defence Force;
- New Zealand Defence Force;
- ADF/NZDF Prime contractors;
